

CaptureVue™ Connector

Connecting AutoVue Web Edition to OpenText Content Server ECM & eDOCS DM

CaptureVue Connector™ for OpenText Content Server ECM and eDOCS DM (formerly Hummingbird Enterprise™) adds document viewing and mark-up capabilities to the DM client. It provides a seamless user interface and tight integration at both client and server levels between eDOCS DM and AutoVue Web Edition.

Mark-ups/Annotations/Redlines are automatically saved on the server and are available to other users to edit or view, depending on their document access level.

Custom applications can be created to extract relevant information from an AutoCAD or MicroStation file, and automatically link it with information (such as a Bill of Materials) available in the DM vault. This brings the concept of intelligent drawings to a new level. These features are available from within your Web Browser using the AutoVue Web Edition.

CaptureVue Connector™ allows existing Vuelink for Content Server and Vuelink for eDOCS DM users to maintain their investment in AutoVue and OpenText when they upgrade to the latest version of Content Server, eDOCS DM and AutoVue. The current supported versions are Content Server 9.7 and 9.7 SP1; eDOCS DM 5.1.0.5, 5.2 and 6.0x; AutoVue 19.3 and 20.0.

Benefits

- ✓ Securely view documents in Content Server ECM and eDOCS DM without editing them.
- ✓ Support for over 450 engineering and business document formats.
- ✓ View multiple mark-up files.
- ✓ Create mark-ups/redlines/annotations using a rich set of annotation tools.
- ✓ Consolidate several mark-up files (perhaps from different reviewers) into one mark-up file.
- ✓ Control regular, read only, master and consolidated mark-up access to mark-up files.
- ✓ Mark-ups are associated with a specific revision of a document.
- ✓ Mark-ups may be migrated to new revisions if needed.
- ✓ Graphically compare different revisions of engineering drawings.
- ✓ Add information from eDOCS DM in watermarks, header or footers when printing.

About Cad-Capture

Cad-Capture provides a complete range of solutions enabling organisations to capture and manage their engineering documents, drawings and data.

The fusion of specialist document conversion and data services with many years experience in systems implementation and application hosting makes it possible for Cad-Capture to provide truly effective solutions.

When considering document, content and data management projects, customers can be confident that Cad-Capture will provide the best available solution.
